

Badisse Chebaane

Data Science Engineering Student

Data Science Engineering student skilled in Machine Learning, Deep Learning and MLOps. Proficient in building end-to-end ML pipelines and deploying AI solutions that drive measurable business outcomes. Actively seeking a summer internship.

WORK EXPERIENCE

Web Developer Intern (PFE)

Juin 2025 – September 2025

Direct Emploi (Job Board Platform), Paris, FR (Remote)

- Automated XML and ATS job-feed ingestion for 50+ employer accounts, reducing manual processing time by 35%
- Executed a targeted web crawling strategy that identified 1,000+ competitor job vacancies, providing valuable insights for onboarding new companies
- Ran SEMrush audits and co-built two production search engines (Formation Continue & Franchise), expanding the platform's indexed job content by 40%

Data Science Intern (PFE)

Mars 2024 –September 2024

Scale IT, Paris, FR (Remote)

- Architected a RAG-based document retrieval system using LLMs and semantic search, cutting average lookup time by 40% versus the prior keyword-only solution
- Built ML evaluation pipelines tracking precision, recall, and MRR, reducing model iteration review cycles by 30% through Streamlit dashboards used in weekly team syncs
- Fine-tuned bi-encoder retrieval models on domain-specific corpora, improving top-5 accuracy by 15 pp over the zero-shot baseline

IT Instructor

July 2024 – August 2024

Onzart International Center, Teboulba, TN

- Designed and delivered a 6-week IT and programming curriculum for 20+ students, with 85% completing all assignments and 3 enrolling in CS programmes afterward

Projects

Aradhi-Tunisian Real Estate Market Platform

January 2026 – May 2026

Esprit, Ariana, TN

- Led the ML workstream in a 6-person team, implementing price prediction (XGBoost, Random Forest, ANN), image classification (MobileNetV2), and a FAISS + Sentence-BERT semantic search engine across 10,000+ listings
- Delivered a modular TDSP pipeline from data collection to deployment – serving models via FastAPI and Flask, with a GPT-2 chatbot, RAG search interface, and Streamlit dashboards hosted on AWS via Cloudflare Tunnel

Evart – Event Ticketing Platform

January 2025 –May 2025

Scale IT, Paris, FR (Remote)

- Developed a dual-platform cultural ticketing system – a Symfony 6 web app and a synchronized JavaFX desktop client – covering event browsing, ticket booking, and artisan product ordering
- Integrated Stripe payments, JWT/session auth, role-based access (admin, organiser, user), and offline-sync mode for the desktop client, with a REST API layer connecting both platforms

CONTACT

SKILLS

Data Visualization/Engineering:

- Power BI
- Pandas, Streamlit
- Excel

Techniques:

- ML Algorithms
- Deep Learning Algorithms
- MLOps

Tools and Frameworks:

- Python (Keras, Scikit-learn)
- Hadoop
- Python, R
- Spring Boot
- Java/ JavaFX
- Symfony, PHP
- Git
- Github Actions, CI/CD
- Docker
- Databases (MySQL)

EDUCATION

Engineering Degree

Major in Computer Science
Minors in Mathematics
Esprit, Ariana, TN – Present

Bachelor's – Software Engineering & Information Systems

Faculty of Sciences of Monastir,
Monastir, TN – June 2024

OTHER

- Member of Enactus Esprit ICT (2025-present)
- Member of ALERT Tunisia (2023-present)
- Member of a vote Office, ISIE Teboulba (2022-2023)
- ATCCM Monastir (2016-2019)
